WORK EXPERIENCE

Oct 2026 – Present	Founder <i>Dentivoice · Remote</i> Building AI voice agents for dental clinics to capture leads lost outside working hours, with the goal of zero missed calls and less staff time spent on calls.
Aug 2026 – Present	Information Technology Developer <i>Farooq Hospital · Lahore, Pakistan · Hospital Information Management System (HIMS) development</i> - Built the Letters module of a Hospital Information Management System (HIMS) for generating and archiving official employee letters (see Projects). - Built BillTrace, an audit-friendly internal app for recording and searching insurance bill numbers, with admin/viewer roles, CSV export, and an audit log supporting restore/revert of deleted or edited records. <i>Technologies: Node.js/Express, EJS, SQLite (dev) / PostgreSQL-Supabase (prod), Render</i>
Jun 2025 – Feb 2026	Founder <i>Techudev · Lahore, Pakistan · Website & marketing services for local businesses</i> Provided website development and marketing services for local brands in Lahore, visiting markets such as Kareem Block, Liberty and Gulberg to work with clients.

EDUCATION AND TRAINING

2026	Bachelor's in Computer Science <i>FAST-NUCES · Lahore, Pakistan</i>
------	---

PROJECTS

Real-Time Voice Receptionist for Aesthetic/Dental Clinics

- Built an AI voice receptionist using Retell for agent configuration and voice cloning to deliver a natural, Urdu-accented conversational experience for local clinics.
- Technologies: Retell, voice cloning*

MedRestock — Reorder Management for a Pharmaceutical Supplier

- Built a full-stack reorder-management app for a pharmaceutical supplier serving several hospitals, with two businesses isolated in one deployment and a full audit trail of stock changes.
 - Automated low-stock reorder emails (at most one per episode, via a unique index and alert state machine), with bulk Excel import and atomic, non-negative stock updates.
- Technologies: React, TypeScript, Fastify, Prisma, PostgreSQL (Supabase); Oracle Cloud VM, nginx, nightly backups*

Clinic Scheduling — AI Booking Agent & Staff Dashboard

- Built an AI booking agent (Google Gemini function calling) that books, moves and cancels appointments by chat or voice, with safety rules enforced in code and race-safe, double-booking-proof scheduling.
 - Added an Agora voice agent, two-way Google Calendar sync and a staff dashboard with per-doctor access; 407 automated tests with CI.
- Technologies: Python, FastAPI, PostgreSQL, Docker, Google Gemini, Agora, Google Calendar API, Twilio*

HIMS Letter Management System

- Built the Letters module of a HIMS: HR staff generate official employee letters from versioned templates, rendered to PDF with Puppeteer and stored immutably in S3-compatible storage.
 - Implemented JWT auth/RBAC (HR admin, branch head, viewer), archive/search, and a reporting dashboard.
- Technologies: React (Vite, Tailwind); Node.js/Express; PostgreSQL + Prisma; Puppeteer; MinIO/S3-compatible storage*

CampusBuddy — Full-Stack Web Platform

- Built a university platform with real-time chat, announcements, lost-and-found and an anonymous confession board, plus OpenAI-based conversation summarization.
- Technologies: React (TS, Vite); Node.js (Express, TS); Firebase Firestore and PostgreSQL*

DIGITAL SKILLS

Agentic AI	Vapi, Retell, Livekit, Upfirst AI, Custom LLMs, VPS configuration, GSM setup, SIP setup, ElevenLabs, Cartesia, Python
Web development	JavaScript, C++, CSS, Node.js, React.js, REST APIs
Databases	PostgreSQL, Supabase, Prisma, Firebase, SQL, SQLite, MongoDB
DevOps	Docker, CI/CD (GitHub Actions), Git, Render, MinIO/S3 storage, environment & secrets management
